

4D Virtual Reality Applications

Wael Abdelhameed, Ph.D.

Associate Professor

University of Bahrain

CONTENT

A- 4D Applications

- 1st Application
- 2nd Application

B- Design Studio Applications

- Structure/Construction Selection
- Creativity Measurement
- Urban Design Theme

4D VR Applications

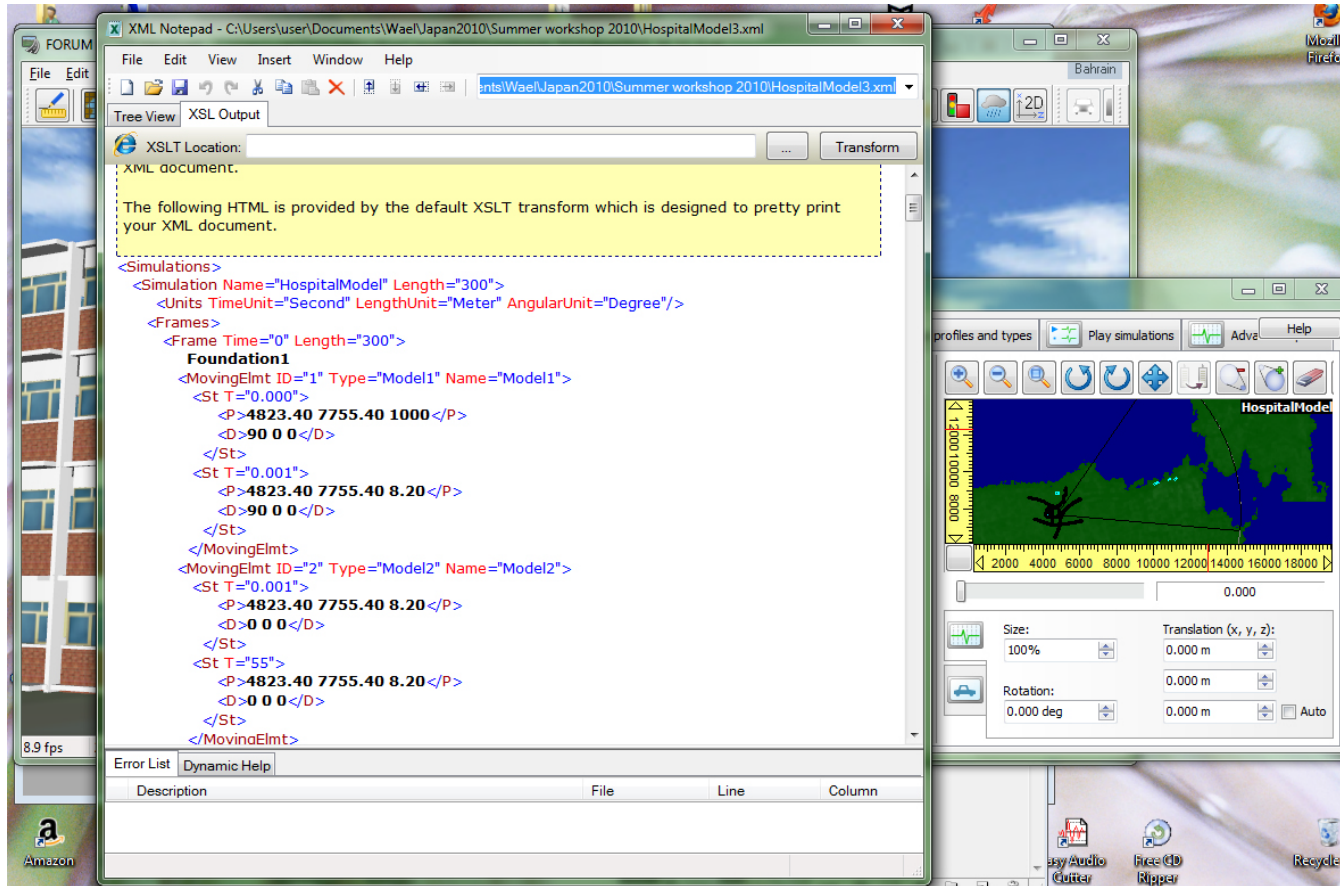

A Building, University Hospital, Used in the Project Management Application.

**Virtual Reality
vs
4D CAD, predefined
scenario animations, or
even static figures**

3D models Used in Project Management Schedule

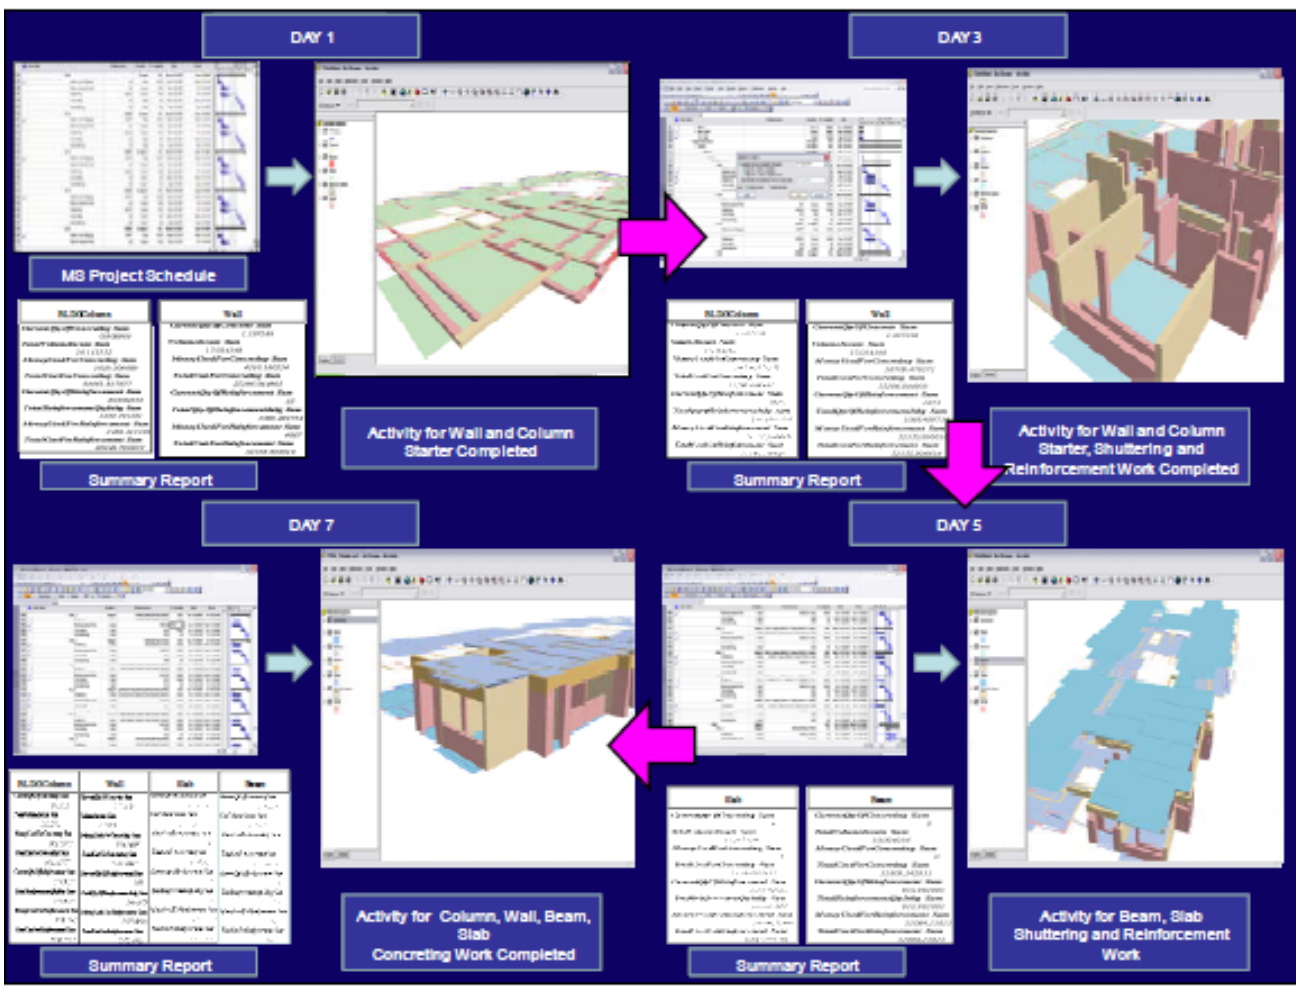

XML file to apply changes in construction through the
microsim player of the **VR Studio**

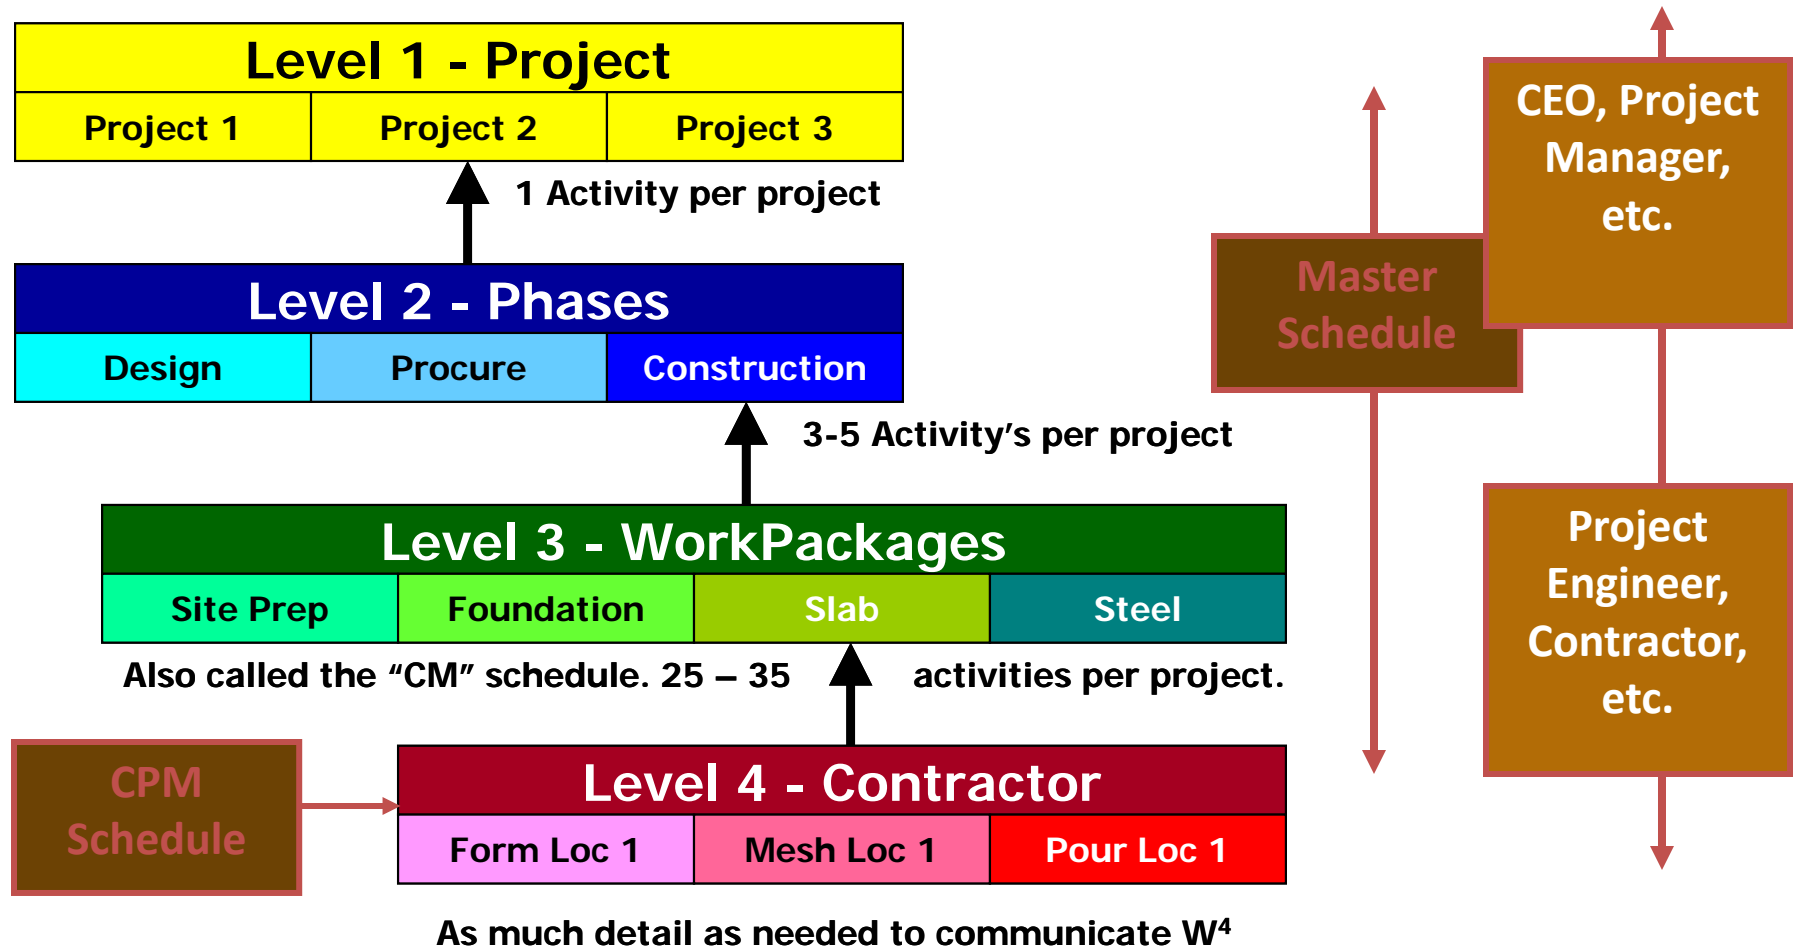

Movie 1

Project Management

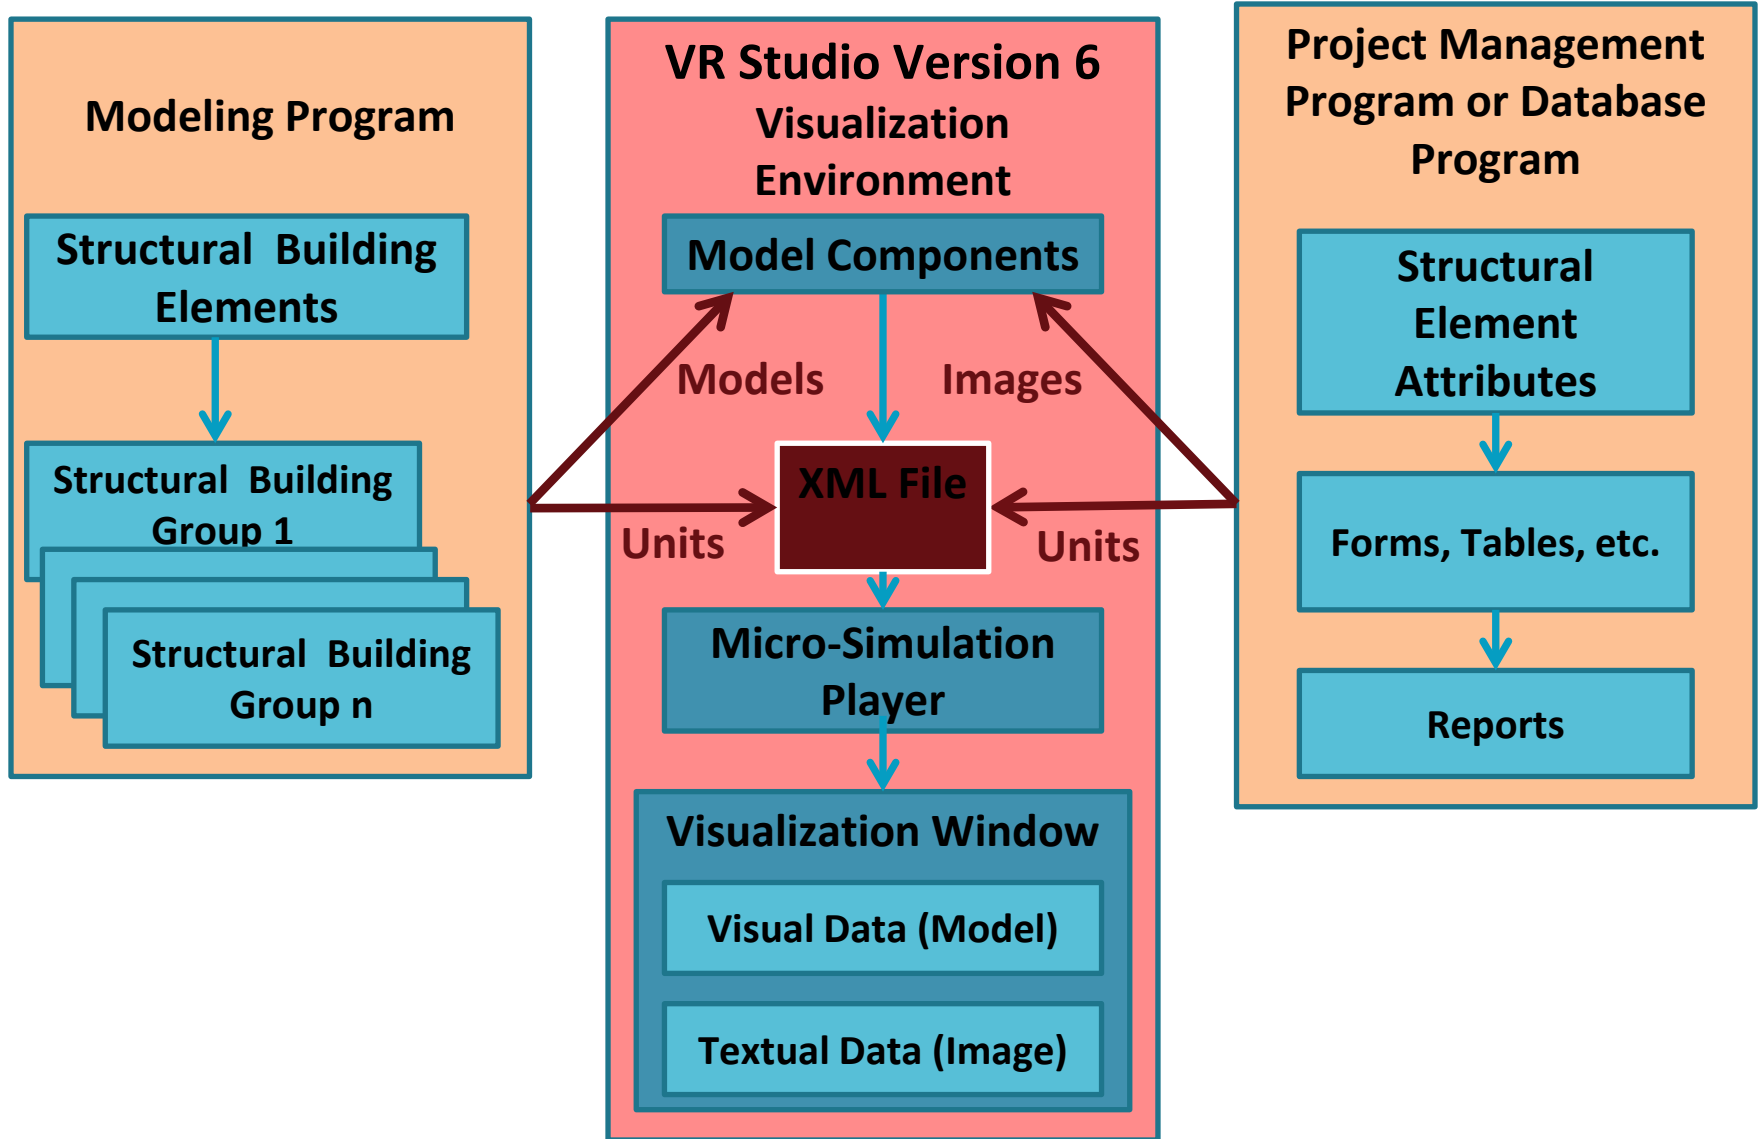

Structure and Construction Process Visualization

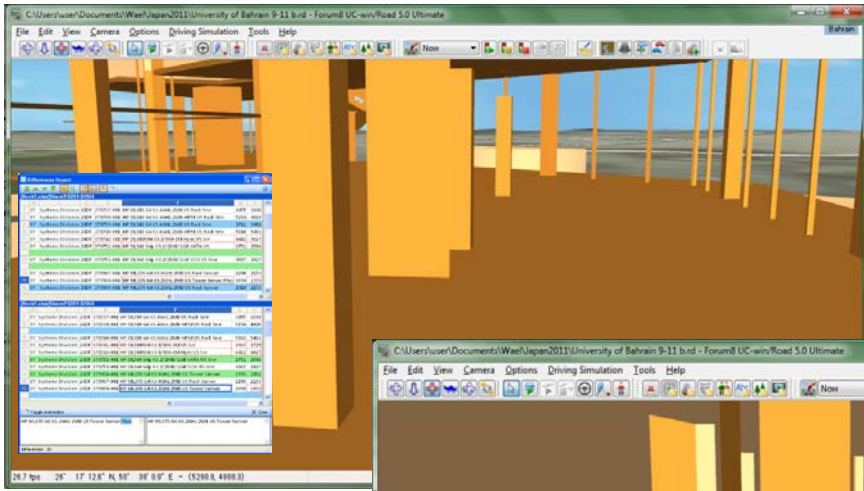

An Example of a Link between MS Project and GIS

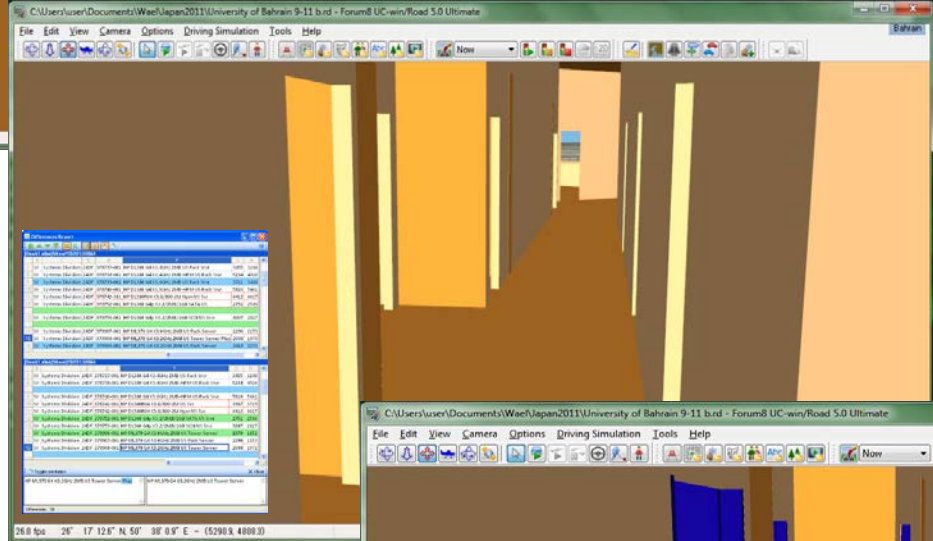

Used information is based on the detail level

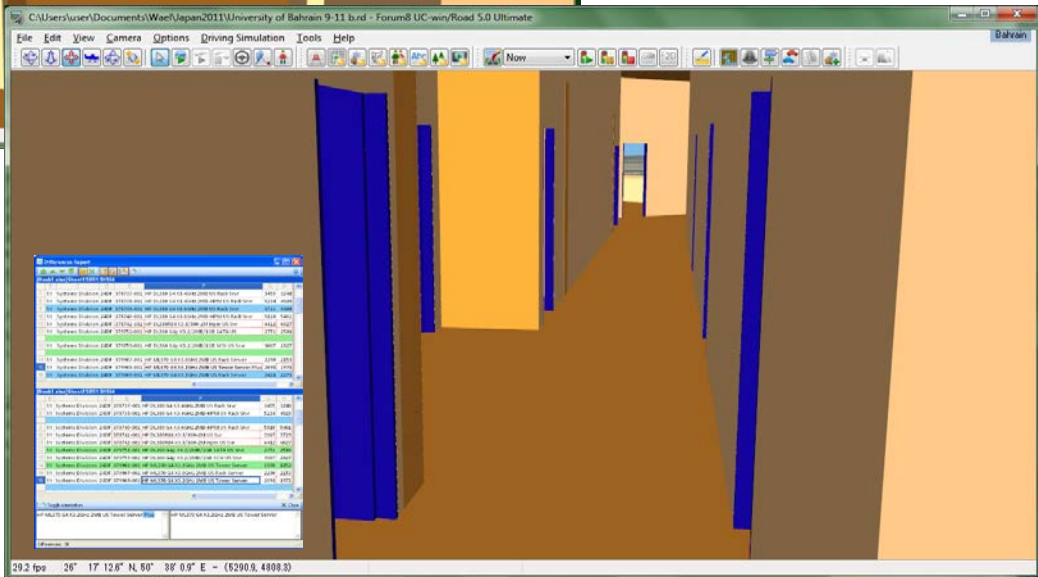

A diagram shows adding textual data to the VR model for construction process visualization

1st Floor columns & slab stage with construction data

1st Floor walls stage with its data

1st Floor doors stage with its data

Screen Shots of Building Interior to Monitor Construction in “VR Studio”

VR Applications in Design Studios

Structure/Construction Theme

Large Span Structural System Design with the VR Use

VR Applications in Design Studios

Measuring Students' Creativity

Creativity and the VR Use

VR Applications in Urban Design Studio

What is **Urban Design**?

- *Urban design* is the process of designing and shaping cities, towns and villages.
- basically the shaping of masses and spaces (solids & voids) to make urban areas **functional**, **attractive**, and **sustainable**.

- The main goal of the design studio is to apply socioeconomic urban concept, among other important objectives.

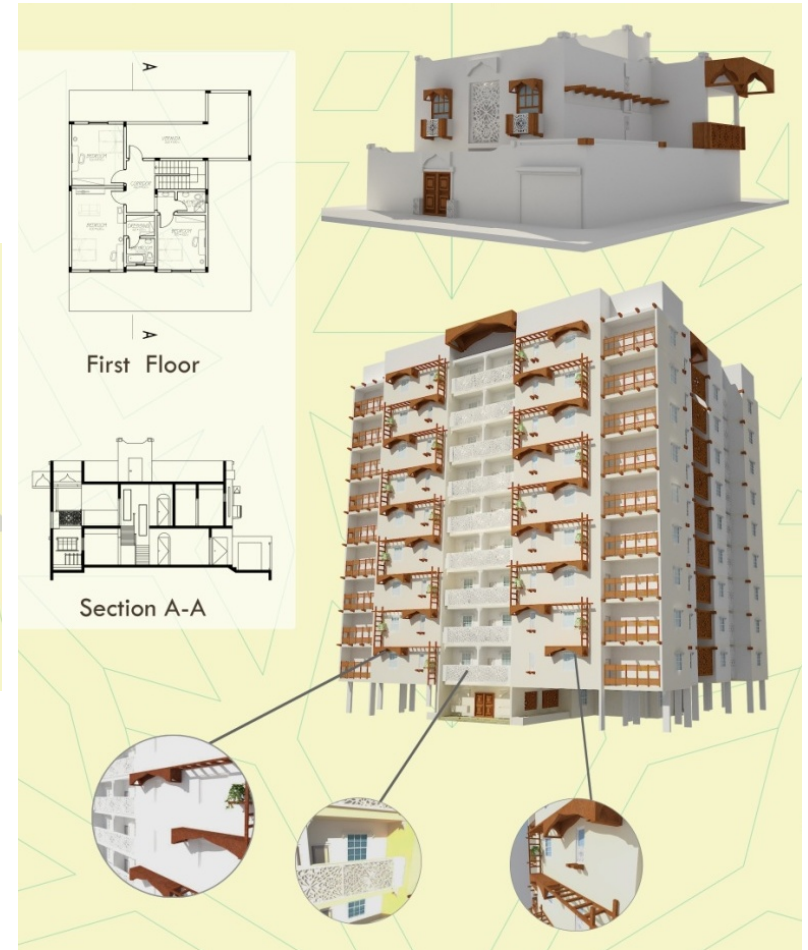

Urban Design Studio

- Students started in groups to conduct an urban design research to apply the main goal.
- Students continued manually designing road network and applying main principles of hierarchy, intersections and distances.
- Urban spaces and open spaces were the next step of designing.

Elements of Residential Neighborhood

- 1 - *Social Services*: Social club.
- 2 - *Economic Services*: Spaces for Small Projects.
- 3 - *Educational services*: Kindergarten.
- 4 - *Recreational Services*: Gardens.
- 5 - *Commercial services*: Shops.
- 6 - *Religious Services*: Mosques.
